The largest business and technology event in Latin America

GX²⁹ September 23-25, 2019

GeneXus Meeting Opportunity

Why is it essential to attend?

Every year, more than 3,500 people from all over the world gather in Montevideo for a powerful, face-to-face meeting with global leaders of the business and software sectors.

Did you know that throughout these 30 years hundreds of successful businesses have been generated in these 3-day meetings?

The GeneXus Meeting is the largest business, innovation, and technology event in Latin America.

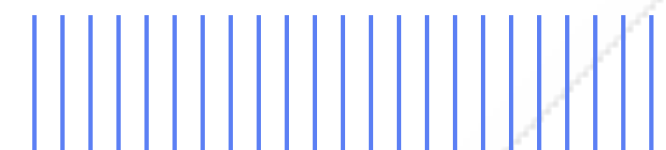

Over the course of three days, there will be more than 180 activities including multi-language sessions, workshops, hands-on labs, exhibits, gala dinners, awards, recognitions, gifts, networking activities, and more.

The GeneXus Meeting is one of the most anticipated events of the year, which is something we're very proud of. Whether in person or online, our events have become a ritual of innovation and synergy that is characteristic of the GeneXus Community.

Nicolás Bortolotti – Google

Development Director – South Region

When I came to the Meeting, I expected to find an ecosystem of developers and a place to share my passion for technology. I found that and much more: a very pleasant place with a diversity of opinions that enriched me. At the same time, we at Google were able to get much closer to developers.

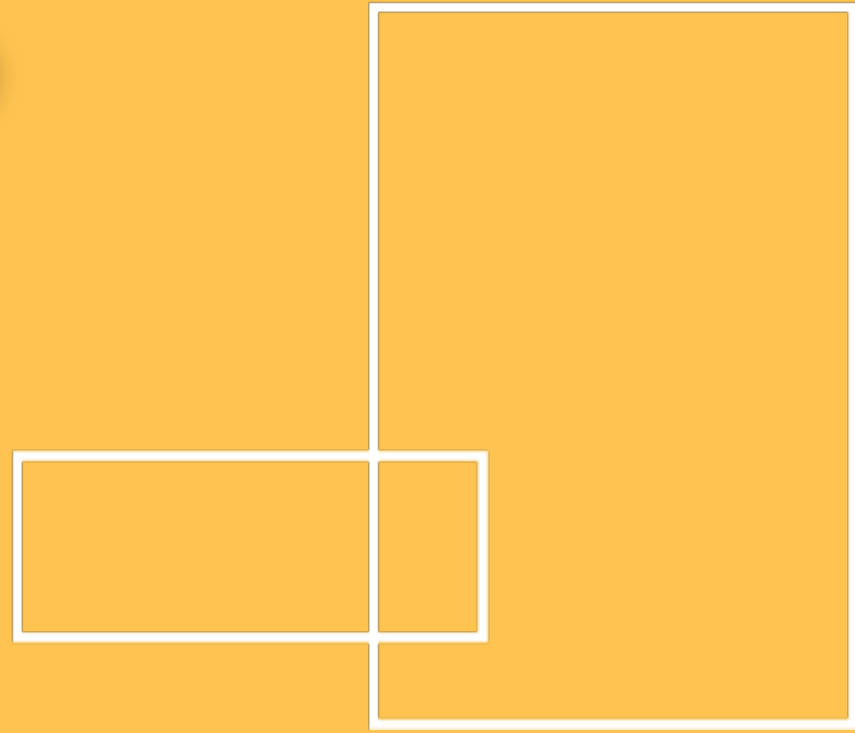

Wilson Pais – Microsoft

Director of Innovation and New Technologies - LATAM

This is a friendly meeting to get up to date with technology. What is happening here at the GeneXus Meeting is a reflection of the current trends unfolding in the world. It's a very interesting event. You don't have to go all the way to New York to be discussing world-class issues, and this happens every year at this event, on its stages and corridors.

Hermann Pais – Amazon Brazil

Marketing Leader

I came to this Meeting to get to know the Community, its brilliant ideas and innovative solutions that were discussed in detail during three days. To those who have never come I would say: Don't miss out! Seize the opportunity to get closer to the future and the people of this Community, their excellent ideas and ability to transform them into concrete solutions.

Jorge Pedro Ramírez – TV Azteca

Systems Development – Mexico

The most important aspect of this Meeting is that you are inspired by its enthusiasm. I can't wait to fly to the office and do things! The value of the event, in addition to being in line with technological advancements and showing how GeneXus can help you, is that it allows you to learn the vision of different people in the technology field. It's a world-class event.
